# Visualize

## the Future with WAGO HMIs

The world of industrial HMI is rapidly evolving with **industry-trusted technologies like WAGO Visual Panel 200 Series driving this innovation.** As the demand for more efficient, convenient, and adaptable systems continues to grow, we can expect HMI technology to play an increasingly important role in shaping the future of industrial automation. By providing user-friendly communication, the WAGO family of HMIs bridge the gap between complex machinery and the people who operate them. This helps to optimize production processes and enhance overall efficiency in automation systems.

Touch Panel 600s

# Connect & Communicate

**The ability to connect using multiple fieldbus and control protocol options once again proves the interoperability of WAGO Automation.** With the WAGO Family of HMI Panels, you have the option to connect and communicate with a majority of the industrial automation controllers on the market. This provides the flexibility to work within your current automation platform and control system. These panels are offered in numerous sizes that are NEMA 4X, 12 rated, IP65 or IP68 certified, and meet international compliance standards for CE, UL and cUL. With a fan-less design and no battery, these HMIs are maintenance free and will fit in most industrial control installations. Visualize your future and your automation control system with the WAGO Family of HMI Panels.

## Aesthetic Design + High Performance

- Fast operating speed with high-performance Cortex A9 Multicore processor
- Combined Control and Visualization programming
  - Flexible CODESYS IEC 61131 design options
  - Program directly within the Linux® open-source operating system
- Standard connection to WAGO's cloud solution options
- High-resolution displays in robust aluminum housing
- Three product lines with specifications to meet your different operating requirements
  - **Standard Line:** Resistive touchscreens for standard control cabinet applications
  - **Advanced Line:** Multi-touch with glass surfaces suited for chemical resistance
  - **Marine Line:** Matte black anti-reflective surfaces and special marine approvals

## Top-Quality Hardware + Design

- Fast operating speed with the high-performance i.MX6 Solo or i.MX8MPlus Quad processor
- Visualization programming
  - State-of-the-art HMI programming software application with a modern and intuitive UI/UX that simplifies HMI projects
  - Accessible to users of all skill levels
- Standard connection to WAGO's controller options using OPC UA and Modbus
  - Other communication options include MQTT (SparkPlug), EtherNet/IP and others
- Panel Mounting
  - with VESA mounting on the 10" models
- Protocol gateway to different fieldbus and Ethernet control protocols
  - Multiple PLC drivers (communicate to a majority of the Industrial Automation controllers)
